

# 1270

## RELIC & COIN metal detector

**Extreme depth with even better sensitivity to relics. Plus, improved iron discrimination that will take you to targets nothing else has ever seen. 70 years in the making. You've been waiting... this is it!**

Building on the tradition of performance and quality in Fisher's 1200 series metal detectors, the 1270 is the pinnacle in a line of superior detectors. Its sensitivity to relics is now better than ever and it's the one to beat in target depth. The 1270 also provides you with a toolbox of easy to use features that will give you an advantage in every treasure hunting situation: like a high resolution iron discrimination mode that enables you to "see through" iron trash like never before, a precision ground balance adjustment for difficult soil conditions, and a "silencer" mode for quiet discrimination. Also, there's a trigger switch for pinpointing and mode changes designed to save you time. After all, you'll need that extra time to recover all your treasure.

### CONTROLS

- POWER ON-OFF/ VOLUME;** OFF/ON switch; adjust knob for desired volume.
- IRON DISC;** High Resolution Iron Discrimination knob for improved target "see-through" in iron trash.
- NORMAL DISC;** Full Range Discrimination knob for normal search mode.
- ALL METAL GROUND ADJ/DISC;** (switch in OFF position) – Disc. mode. (switch in ON position) – all metal mode; adjust knob to ground balance.
- SENSITIVITY;** Adjust knob for optimum target sensitivity. Full clockwise position provides a low audio threshold.
- SILENCER;** Switch ON for silent discrimination, OFF for standard discrimination.
- IRON;** switch ON for iron disc. mode, OFF for normal search mode.
- TRIGGER SWITCH;** Three-position, spring-loaded trigger switch; center position for primary search mode, push for secondary search mode, pull for pinpoint.

### FEATURES

- Three Search Modes – normal discrimination, enhanced iron discrimination, and all-metal ground balanced search**
- Patented Double Derivative, Crystal-Locked Electronics (U.S. Patent # 4,514,692)**
- Enhanced Relic Sensitivity**
- "Cutting Edge" performance in moist soils**
- Improved "See-Through" in iron trash**
- Sensitivity Control to enable silent search or audio threshold**
- Silencer for silent (3<sup>rd</sup> derivative) discrimination**
- Trigger Switch mode change**
- Trigger Switch Zero-Motion Pinpointing**
- Near Perfect Balance for comfortable use**
- Lightweight Cushioned Arm Rest & Grip**
- Low Battery Alert – LED blinks automatically**
- Drop-in batteries**
- Double locking lower stem**
- 3 piece breakdown handle**
- Limited Lifetime Warranty \***

Backed by Fisher's **LIFETIME WARRANTY\***

# 1270

## SPECIFICATIONS

Subject to improvement, modification  
or change without notice.

### WEIGHT

3.5 lbs.

### LENGTH

Extended ..... 52" <sup>2</sup>  
Collapsed ..... 42" <sup>2</sup>

### FREQUENCY

VLF-Search ..... 8.2 KHz, Quartz Crystal Controlled  
Audio Target Response ..... 512 Hz Unipolar <sup>3</sup>

### SEARCH MODES

Normal Disc ..... VLF-Slow Motion Discrimination <sup>4</sup>  
Iron Disc ..... VLF-Slow Motion Discrimination <sup>4</sup>  
Ground Balanced ..... VLF-Slow Motion All Metal  
Pinpoint ..... VLF All Metal, No-Motion  
No Threshold Operation ..... Yes<sup>3/6</sup>

### OUTPUTS

Low Battery Alert ..... Automatic (LED)  
Built-in Speaker ..... Yes  
Stereo Headphone Jack ..... Yes

### SEARCH COILS

Type ..... Concentric, Co-planar Spider Coil  
Diameter ..... 8"  
Shielding ..... 100% E.S.I.<sup>5</sup>  
Interchangeable ..... Yes  
Submersible ..... Yes

### BATTERIES BATTERY LIFE

(2) 9 Volt  
Carbon Zinc ..... 15-25 hours <sup>2</sup>  
Alkaline ..... 30-40 hours <sup>2</sup>

### WARRANTY

Lifetime Limited Warranty\*<sup>7</sup>  
\*Warranty may vary outside of the U.S.  
Warranty applies to the Original Purchaser Only. See your dealer for details.

### NOTES

1. Subject to modification without notice.
2. Approximate.
3. PULSEGATE UNIPOLAR AUDIO PROCESSING.  
Advanced Fisher circuitry which allows silent operation below the "Audio-Threshold Tone" with no sensitivity loss. (See Note 6 also).
4. The 1270 is a "motion" detector while in the search modes, meaning that the search coil must be moving at least slightly to detect a target.
5. Electro-Static-Insulated to eliminate certain types of false signals.
6. The 1270 can operate silently with no "Threshold Tone" (See Note 3); however, in the "maximum" sensitivity position, a low audible threshold is provided.
7. Fisher does not warrant suitability to specific use. Fisher shall in no event be liable for any direct or, incidental, consequential or indirect damages.

### ACCESSORIES

#### STANDARD EQUIPMENT

8" Search Coil  
Operation Manual

#### OPTIONAL EQUIPMENT -

5" Search Coil  
10.5" Search Coil  
Coil Covers

Carry Bag  
Hard Carrying Case  
Fisher Phones  
Stereo Phones
